CAREER OBJECTIVE

Dynamic and detail-oriented Computer Science graduate with strong skills in Python, SQL, NumPy, Pandas, HTML, CSS and JavaScript. Passionate about building scalable web applications, optimizing backend logic, and enhancing user experiences. Seeking an opportunity to contribute technical expertise, problem-solving skills, and a growth mindset to a dynamic development team. Focused on continuous learning and delivering efficient, high-quality software solutions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Kamala Institute of Technology and Science CGPA – 7.5

Nov 2021– June 2025

Board of Intermediate Education

Sree Chaitanya Junior College CGPA – 9.6

June 2019 – March 2021

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Web Technologies:** HTML, CSS, JavaScript
- **Data Handling Tools:** VS Code, Jupyter Notebook, SQL Server Management, Python IDLE.
- **Operating Systems:** Windows
- **Data Science and Machine Learning:** Numpy, Pandas, Data Analysis, EDA, ML Model Building.

PROJECTS

Chef Booking System – Python full stack

- Designed responsive and user-friendly frontend UI using HTML, CSS, and JavaScript for chef browsing and booking.
- Created pages to view chef profiles, ratings, and availability for better user experience.
- Integrated the frontend with Python (Flask) backend and MongoDB for booking and data management.

Auction Website – Java full stack

- Developed a fully functional online auction platform for buying and selling products.
- Implemented user authentication and authorization for secure bidding and management.
- Designed a real-time bidding system where users can place and update bids dynamically.
- Built a responsive and user-friendly interface using HTML, CSS and JavaScript.
- Managed product, user, and bidding data using MYSQL database.

INTERNSHIP

Data Science and Machine Learning

- Completed an end-to-end Ecommerce Data Analytics and ML project involving Cleaning, Pre-processing, Visualization, Model Building and Prediction to derive business insights.
- Improved model accuracy through tuning and performance metrics evaluation.

Forest Fire Detection

- Built a forest fire detection model using Transfer Learning with pre-trained CNN models.
- Performed image pre-processing, data augmentation, and fine-tuning to improve accuracy.
- Evaluated model performance for early and reliable fire detection.

CERTIFICATIONS

- Workshop on Python Full Stack by BrainoVision solutions pvt.Ltd.
- AWS Academy Graduate-Cloud Foundations.
- Certificate of Internship on AI-ML by Eduskills.
